SUMMARY

Senior iOS Developer with 12 years of commercial mobile development experience, including 7 years specializing in iOS development. Experienced in iOS application development and architecture, performance optimization, concurrency, and complex user interfaces. Core stack: Swift, UIKit, SwiftUI, Objective-C, GCD, Swift Concurrency (async/await), REST APIs, Realm, and Core Data. Experienced in profiling and optimizing UI performance, memory usage, scrolling, allocations, data processing pipelines, and Main Thread workload using Instruments. Designed, developed, and shipped production mobile applications, including white-label solutions, from architecture through release.

PROFESSIONAL SKILLS

Core Skills

- Performance optimization (UI, memory, scrolling, allocations)
- Data pipeline optimization
- Multithreading & main thread management (GCD, async/await)
- Debugging & Profiling (Instruments)

Technical Skills

- **iOS:** Swift, UIKit, Foundation, Objective-C, SwiftUI, UICollectionView, Diffable Data Source, Auto Layout, AVFoundation, CoreLocation, MapKit
- **Architecture & DI:** Clean Architecture, VIPER, MVVM, SOLID, Coordinator, Repository, Dependency Injection (DI), DIP, Swinject, Needle
- **Concurrency & Performance:** Swift Concurrency, async/await, GCD, OperationQueue, Main Thread, Performance Optimization, Instruments, Memory Graph
- **Data & Networking:** REST APIs, HTTP, JSON, URLSession, Alamofire, WebSockets, Realm, Core Data, Keychain, UserDefaults
- **Tools & CI/CD:** Git, GitFlow, CI/CD, Fastlane, Tuist, Sentry, Firebase, AppMetrica
- **Cross-platform (Flutter):** Dart, Provider, GetX, GoRouter, REST API, White-label

PROFESSIONAL EXPERIENCE

September 2024 —
Present
(2 years 1 month)

IT_One

Senior iOS Developer

FinTech company developing a mobile banking super app for individual and business customers

Key responsibilities: developing product features for a mobile banking application, enhancing and refactoring existing iOS modules, and improving navigation, error handling, and notification mechanisms.

Key Achievements

- **Optimized Sentry-based error monitoring**, reducing irrelevant events **from 25% to 4%** by implementing error-handling and retry logic in Swift and developing a local fork of the Sentry SDK in Objective-C.
- **Developed a Swift CLI tool for automated sandbox environment setup**, reducing setup time **from 1–2 days to 30 minutes** and accelerating feature development **by 2–3×** through reduced project build times.
- **Developed and delivered an in-app user survey module**, including a home-screen widget, REST API integration, and display logic. The solution is used by product teams to collect user feedback and improve products.
- **Resolved critical defects and refactored legacy code** to improve application stability, increasing Crash-Free Users Rate **from 99.77% to 99.97%** within one quarter and reducing crashes **by 7.7×**

August 2022 — July
2024
(2 years)

Togezzer.net

Senior iOS Developer

Startup developing an enterprise messenger with task-tracking capabilities

Key responsibilities: developing new features and enhancing existing iOS application modules, refactoring legacy code, and optimizing the user interface.

Key Achievements

- **Initiated and justified a major refactoring** of the chat module instead of the originally planned UI redesign, reducing chat loading time **from 6–10 seconds to ~1 second** and eliminating UI delays and freezes.
- **Optimized cold start and the data processing pipeline** based on profiling with Instruments, reducing time to usable UI **from ~40 seconds to ~4 seconds** by eliminating unnecessary data model creation and transformations, repeated allocations, and excessive Main Thread workload.
- **Redesigned the media loading and caching pipeline** by optimizing the asynchronous task queue for image downloading, processing, and caching. Eliminated race conditions related to UICollectionView cell reuse, preventing incorrect images from being displayed.

Recommendation letter from the founder of Togezzer available upon request.

September 2014 —
August 2022
(8 years)

Business-Soft LLC

Mobile Developer → Lead Mobile Developer

Russian IT company specializing in FoodTech solutions

Key Achievements

- Developed and scaled a white-label food delivery platform that became the foundation **for more than 120** iOS and Android applications.

ADDITIONAL COMMERCIAL EXPERIENCE

CET

Lead iOS Developer

NYC-based ride-hailing startup

Key Achievements

- **Designed the architecture and developed** three native iOS applications for a ride-hailing platform: a passenger app, a driver app, and a doorman app for arranging rides on behalf of customers.
- **Implemented location and mapping features** using CoreLocation and MapKit, REST API integration, and real-time coordinate transmission over UDP.

COMMERCIAL FLUTTER PROJECTS

Key Achievements

- **Developed and released three commercial mobile applications** for iOS and Android, designing a white-label architecture and implementing the business logic and UI.

EDUCATION

2013	Odesa National Academy of Food Technologies PhD in Engineering
2010	Odesa State Academy of Refrigeration Master's degree in Computer Systems and Networks

LANGUAGES

Russian – Native, Ukrainian – Native, English
